almoutasem.ly | linkedin.com/in/almoutasembelah-khalifa | github.com/Almoutasembelah-Khalifa

Summary

Full-stack mobile developer building cross-platform Android and iOS applications from a single Flutter codebase, with web work in Svelte and Laravel. Comfortable owning a product end to end: translating Figma designs into pixel-accurate interfaces, modeling and querying the database, and wiring up authentication, payments, REST API integration, and real-time data. Native Arabic speaker with C1 English, experienced in shipping fully localized, RTL-ready apps.

Education

University of Alrefak
Bachelor of Science in Computer Science

Tripoli, Libya
Graduated 2025

Experience

Self-Employed
Freelance Flutter / Mobile Developer

Tripoli, Libya
December 2025 – Present

- Work directly with clients to scope requirements and agree on architecture and stack, delivering cross-platform Android and iOS apps from a single Flutter codebase
- Translate Figma designs into pixel-accurate, responsive interfaces and refine them across client review cycles
- Select and implement the backend per project, using Supabase or Firebase for authentication, real-time data, and file storage, and designing relational schemas in PostgreSQL where the domain calls for it
- Integrate REST APIs and third-party services, verifying endpoints and payloads in Postman before wiring them into the client application
- Own delivery end to end: version control in Git, and packaging signed release builds for client testing ahead of Google Play and App Store submission

Projects

Property Rental Marketplace | *Flutter, Dart, Supabase, PostgreSQL*

- Built a cross-platform property rental marketplace in Flutter, powered end to end by Supabase for authentication, database, real-time updates, and storage
- Implemented phone and OTP authentication through Supabase Auth, integrated with a local SMS provider
- Wrote PostgreSQL RPCs backing filterable property search, a guest booking flow with wallet-escrow payments and host approval, an in-app wallet, and favorites
- Shipped full English and Arabic localization with complete RTL support and an extensible setup for adding further languages

Hidden Libya | *Flutter, Dart, Supabase, PostgreSQL*

- Developed a mobile tour guide app in Flutter using Supabase Realtime for live data synchronization across devices
- Handled user accounts with Supabase Auth and user-generated photos with Supabase Storage
- Built a searchable database of 14+ attractions with live content updates and social features letting users post reviews and images
- Delivered the entire experience through a multilingual, localized interface

Technical Skills

Languages: Dart, HTML, CSS, JavaScript/TypeScript, PHP, SQL (PostgreSQL), C++, Java

Mobile: Flutter, cross-platform Android and iOS, State Management(Bloc, Riverpod), responsive layouts, reusable widgets, Google Play and App Store release builds

Web: Svelte, Laravel

Backend & Databases: Supabase, Firebase (Auth, Cloud Firestore, Cloud Storage), PostgreSQL, REST APIs

Developer Tools: Git, GitHub, VS Code, Postman, Figma

Concepts: Clean Architecture, Object-Oriented Programming, Algorithms & Data Structures, Mobile Security (OWASP MASVS), Localization & RTL

Certifications & Achievements

Foundations of Cybersecurity | *Google*

Play It Safe: Manage Security Risks | *Google*

ICPC Libyan Collegiate Programming Contest

Languages

Arabic: Native

English: C1, Advanced (IELTS Certified)
